PROFESSIONAL PROFILE

Experienced specialist in digital learning and educational development with 12 years of experience in the university sector, working extensively in international and cross-institutional contexts. Leads strategic development projects and capacity-building initiatives across Europe, Asia, and Africa, with a focus on digital transformation and professional development of educators in global partnerships.

Particularly focused on the interaction between pedagogy, technology, and organization – and how online learning, digital tools, and generative AI can strengthen teaching quality and support sustainable educational development across diverse cultural and institutional settings.

CORE COMPETENCIES

- Expert in online and blended learning
- Insight into learning and development
- Leads projects with focus on progress, direction, and shared ownership
- Provides structure and ensures timely, high-quality, and coherent task execution
